H.S.L.C. EXAMINATION, 2020

SCORING KEY/OUTLINE ANSWER AND MARKING SCHEME
SUBJECT & PAPER : **SOCIAL SCIENCE (GEOGRAPHY)**

Sl. No.	Key	Mark for each point	Total Marks
1	Since the petroleum produced in India is not sufficient for home consumption, she imports huge quantities of crude oil from other countries.	1	1
2	In order to mitigate cyclonic storms in coastal areas, we have to plant trees along the coast.	1	1
3	(a) Water transport is the cheapest mode of transport. (b) It is suitable for carrying heavy and bulky material (c) It is fuel efficient and eco-friendly. (any two)	1+1	2
4	(i) In this present day world of globalization, our industries need to be made more efficient and competitive. (ii) Our manufactured goods must be at par in quality and price with those in the international market.	1+1	2
5	(a) Roads can negotiate steep slopes and sharp turn in a hilly region like Manipur (b) They are suitable for short distance journeys and provide door to door service. (c) Since roads connect Manipur with other states of India, they are useful for transporting different types of goods. (d) They are also used as a feeder to other modes of transport. (any two)	1+1	2
6	 <p>Showing the Super Highway (Golden Quadrilateral) by drawing a firm line connecting Delhi, Mumbai, Chennai and Kolkata. Namerup Thermal plant is to be located in upper Assam.</p>	1+1	2

7	<ul style="list-style-type: none"> (i) This method of rain water harvesting increases water availability and checks the declining of ground water table. (ii) It improves the quality of ground water through dilution of the contaminants like fluoride and nitrates. (iii) It helps in controlling flood and soil erosion can also be checked. (iv) It helps in arresting salt water intrusion in coastal areas. <p style="text-align: right;">(any three)</p>	1X3	3
8	<ul style="list-style-type: none"> (i) The process of tanning has been changed from using bark or vegetable to chrome or chemical. (ii) This has greatly increased the pollution load in the area since the effluents discharged from the tanneries were ten times more poisonous than the domestic sewage. (iii) Untreated effluents from the tanneries have polluted the ground water of the area and the Ganga river. 	1X3	3
9	<ul style="list-style-type: none"> (a) Ferrous, Non-ferrous and Precious are the three types of metallic minerals. Minerals that contain iron are ferrous and the best example is iron ore. (b) Metallic Minerals which do not have iron content are non-ferrous and copper is an example. (c) Those which have high economic value e.g. gold and silver and precious minerals. 	1X3	3
10	<ul style="list-style-type: none"> (a) Regur soils are formed by the decomposition of basaltic rocks whereas alluvial soils are formed by the deposition of alluvium. (b) Regur soils are deep, clayey and impermeable whereas alluvial soils are made of sand, silt, clay etc. and are permeable. (c) Regur soils are rich in calcium carbonate, magnesium etc. whereas alluvial soils are rich in potash and lime. (d) Regur soils are typical of the Deccan plateau whereas alluvial soils are found in the northern plains and deltaic regions. <p style="text-align: right;">(any three)</p>	1X3	3
11	<p>Favourable factors :</p> <ul style="list-style-type: none"> (i) Climatic conditions : <ul style="list-style-type: none"> (a) The climate of Assam is characterized by high annual temperature i.e. 20°C to 30°C. (b) It is also characterized by high annual rainfall of 150cm to 300cm and it is evenly distributed over the year. (ii) Soil : Assam has deep fertile soils which are rich in humus and organic matters. Hence, tea plantation is very much suited. (iii) Relief : This state has extensive areas of well drained, gently sloping hills and valley sides. These lands are suitable for growing of tea crop. (iv) Labourers : Tea plantation requires abundant supply of skilled and cheap labourers since it is a labour intensive crop. Such labourers are available from Assam and its neighbouring states. 	1X5	5

(OR)

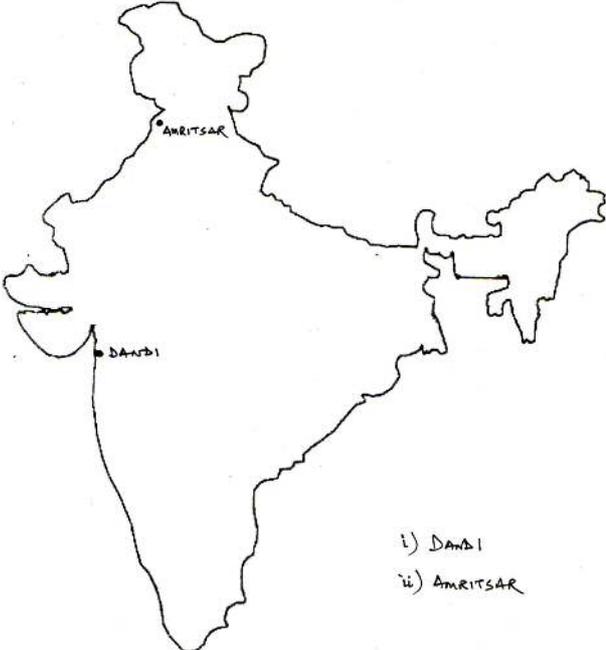

Reasons

- (i) In India, there has been gradual shift from cultivation of foodgrains to cultivation of other crops.
- (ii) The country's net sown area is declining day by day due to the use of arable lands to non-agricultural purposes.
- (iii) Natural calamities such as flood, drought, cyclones etc. affect some particular states where food crops are extensively grown.
- (iv) The productivity of land has started showing a declining trend mainly due to inefficient water management. As the result, productive soils have been degraded.
- (v) The cost of production of the crops is increasing day by day.
